Awareness on AIDS day and Blood Donation Activity

- ***Theme of Blood donation:***
 - It focuses on patients requiring life-long transfusion support and underlines the role every single person can play, by giving the valuable gift of blood or plasma
- ***Who should not donate the blood:***
 - People cannot donate if they have a cold, flu, sore throat, cold sore, stomach bug or any other infection. If they have recently had a tattoo or body piercing cannot donate for 6 months from the date of the procedure.
- ***Why AIDS patients don't donate blood:***
 - Antibodies are the body's reaction to infection, but unlike antibodies to other infections, HIV antibody is unable to overcome the virus and eliminate it from the body. Because the virus is also in the blood, it can be passed on to the recipient of blood transfusion.
- ***Slogan:***
 - The day is also an opportunity to thank voluntary, unpaid blood donors for their life-saving gifts of blood. This year, the World Blood Donor Day slogan is "Give blood, give plasma, share life, share often."
- To wipe off the scarcity of blood
- To ensure availability of safe and quality blood
