ANAEMIA AWARENESS AMONG GIRLS

De warming day

9-2-24

On the 9th of February, a crucial Mass Deworming program was held at the college, aimed at promoting health and raising awareness about anemia, particularly among girls. The event was organized with the assistance of the Primary Health Centre (PHC) staff, who played a vital role in ensuring its success.

The PHC team visited the college and distributed Albendazole tablets to every student, faculty, and staff member present. Albendazole is a widely used medication that helps in eliminating parasitic worms, which can be a significant cause of various health issues, including malnutrition and anemia. Anemia, a condition characterized by a deficiency of red blood cells or hemoglobin, is particularly prevalent among adolescent girls, and one of its leading causes is parasitic infections that can result in nutrient loss.
