⇒ **WIFI-ROUTER FOR INTERNET ADMINISTRATION**

College router" typically refers to the networking device used to provide internet connectivity within a college campus. These routers are often more robust than typical consumer-grade routers to handle the high volume of users and traffic found in such environments.

Here are some key features and considerations for a college router:

**Wireless Standards:** The router should support the latest Wi-Fi standards (e.g., 802.11ac or 802.11ax) to ensure fast and reliable wireless connectivity for all users.

**Security Features:** Given the sensitive nature of college networks and the potential for cybersecurity threats, robust security features such as WPA3 encryption, firewall protection, and intrusion detection/prevention systems are essential.
