**A Brief report
on
NUMERICAL METHODS**

Title: "NUMERICAL METHODS"

Date: 6 – 8th February 2023

The SAS Degree College in Narayanapuram, Department of Mathematics recently hosted a workshop on "NUMERICAL METHODS". The objectives of this event were to highlight mathematical skills, encourage problem-solving abilities, and cultivate a positive competitive spirit among students.

Event Format:

The Numerical Methods workshop offered a thorough review of the many approaches and algorithms utilized to solve mathematical puzzles that crop up in computer science, physics, engineering, and other disciplines. The goal of the workshop was to provide participants with the theoretical understanding and practical abilities needed for effective problem-solving with numerical approaches.

Students from all academic levels, including undergraduates, enthusiastically participated in the event. The wide range of backgrounds and skill sets fostered a dynamic environment for learning and cooperation.

The Highlights:

- The workshop commenced with an examination of the theoretical foundations behind numerical techniques. A thorough discussion was held on fundamental ideas like approximation, differentiation, integration, and interpolation. The importance of numerical techniques in approximating solutions to challenging mathematical problems became clear to the participants.
- Algorithmic Understanding: A variety of numerical algorithms, such as approaches for locating roots, solutions for linear algebraic equations, and optimization strategies, were presented to the participants. The significance of comprehending the underlying

A Brief report

on

Webinar on Impact of COVID-19 on Indian Economy Challenges and Opportunities

COVID-19 crisis has caused an unprecedented collapse in economic activities across the globe and Indian economy is not exceptional. According to International Monetary Fund (IMF), the global economy is expected to shrink by over 3 per cent in 2020-21, the steepest slowdown since the great depression of 1930, much worse than during the 2008-09 financial crisis. IMF has projected that the Indian economy to grow at 1.9% in 2020-21.

The pandemic causes a significant impact on individual lives, Industries, and businesses in the country. COVID-19 pandemic has had devastating effect on migrant workers and daily wage earners. They lost their livelihood due to lockdown and this has created issues including starvation, separation from family and no alternative forms of employment which results in lakhs of migrants have been forced to walk for days to reach their native places. COVID-19's impact on agriculture sector has far-reaching effects beyond food security. MSME sector that forms the backbone of the Indian economy have been the worst casualty of COVID-19 induced lockdown due to their size, scale of operation and limited financial and managerial resources. To combat the COVID19 crisis the Govt. of India announced Atmanirbhar Bharat Abhiyan, an economic stimulus package of Rs. 20 lakh crores with intended objectives of interim measures such as liquidity infusion and directs cash transfers for the poor and long-term reforms in growth critical sectors. The details about the package were announced by the Union Finance Minister Smt. Nirmala Sitharaman in 5 tranches. These tranches were announced by the finance minister via press conferences from May 13, 2020, to May 17, 2020. The package included Rs 8 lakh crore in liquidity measures announced by the RBI.

The government will also provide a 100% guarantee to Rs 3 lakh crore in small business loans. This may be helpful to revive the economic activities and create new opportunities for growth in sectors like agriculture, MSMEs, Power, Coal and Mining and service sectors. In this background, it is proposed to organize a webinar on "Role of Atmanirbhar Bharat Abhiyan in Indian Economy during post COVID-19 Scenario".

Objective of the Webinar:

This webinar aims to bring together Academicians, Professionals, Research Scholar and students from SAS Government degree college. The highlight of the webinar is to give opportunity researchers and academicians and students to fulfil the following objectives.

1. Impact of COVID-19 on Indian Economy as a whole
2. Impact of Atmanirbhar Bharat Abhiyan on growth critical sectors
3. Challenges associated with Atmanirbhar Bharat Abhiyan
4. Post COVID-19: Role of India in Global Economy

Post-Covid – Indian Economic Scenario

- World is battling with Modern Horrors like Corona Pandemic, which brought entire world to a stand.
- A challenging Task for Global economy and a testing time for India's ability to cope with the crisis.
- Human Life Comes first, Money is secondary.
- If no advance action is taken timely, it may mean an economic collapse.
- The post-pandemic world will wake up to a new trading culture. pandemic has battered all sectors of the economy, with the MSMEs among the worst-hit.

The Crisis & Opportunities

- Economists predict a severe Global Economic Recession in which both Advanced economies as well as Emerging economies will show contraction.
- This is 4th Recession since Independence, and first after the economic reforms taken up in 1991.
- Earlier recessions took place in 1958, 1966 and 1986 and for each time it was due to monsoon failure that hit agriculture, then it was sizable part of the economy.

Ganita Ashtavadhanam

- **1. SAPAASYAPURANAM (COMPLETING OR FILLING UP A MAGIC SQUARE):**
 Pruchaka (Questionair) gives the required total. Avadhani fills each row of a 4 X 4 magic square in four rounds. Avadhani fills in the magic square in 4 rounds off and on and finally reveals the required sum which satisfies 18 properties of a magic square.
- **2. VARAGANANAM (CALENDER CALCULATION):**
 The Pruchaka puts year, month and date to know the day on which it falls.
 The Avadhani responds to it with right reply.
- **3. DATTANKARI (DIGITAL ALLOCATION):**
 Pruchaka gives a 3 digit number in 1st round. Avadhani adds a three digit number in 2nd round. In 3rd round, pruchaka adds another three digit number, in the last round Avadhani adds three more digits to that, making a 12 digit number which is divisible by 13.
- **4. NISHIDHANKAM (DIGIT PROHIBITION):**
 Pruchaka wants an eight digit number divisible by 7. Avadhani starts to allocate the number digit by digit, beginning from Crores place, Pruchaka prohibits one digit that should not be placed as the following digit i.e., in the ten lakhs place. Thus the pruchaka prohibits the following digits. The 8 digit number formed by the Avadhani satisfies the conditions of the Pruchaka.
- **5. MANASSANKALANAM: (MENTAL ADDITION)**
 Pruchaka will be saying 3 digit numbers one for each round and two numbers in last round. Eventually the Avadhani says the sum of those five 3 digit numbers.
- **6. GHANAMULAM (CUBE ROOT)**
 Pruchaka gives a perfect cube number (not more than 10,00,000). Then Avadhani tells its cube root.
- **7. AVRUTHADASAMSAM (RECURRING DECIMAL CALCULATION):**
 Pruchaka asks Avadhani to say the recurring decimal of fractions having primes as the denominator i.e., 1/17, 1/13, 1/117, 1/19 etc., Avadhani has to respond.
- **8. SARASA PRASANGAM (IRRELEVANT & IRREGULAR CONVERSATION):**
 The Pruchaka makes out mathematical juggleries to create violent vibrations in the concentration of the Avachan's mind and heart. They retort amusingly and pleasantly with imrnence interaction. The Avadhani exhibits his exciting gestures lest there should be no cracks or breaches in his mental stability and fertility.

Thus the programme will be conducted in 4 rounds in an inspiring manner.

A Brief report

on

GANITHA ASTAVADHANAM

Title: "GANITHA ASTAVADHANAM"

Date: 21-12-2022

The SAS Degree College in Narayanapuram, Department of Mathematics recently hosted an event called "GANITHA ASTAVADHANAM" On the Occasion National Mathematics Day. The objectives of this event were to highlight mathematical skills, encourage problem-solving abilities, and cultivate a positive competitive spirit among students. The event's format was inspired by the traditional Indian literary and intellectual performance art known as astavadhanam.

Event Format:

As comparable to the traditional Astavadhanam's eightfold exercises, the Ganitha Astavadhanam comprised eight rounds of difficult arithmetic problems. Mathematical knowledge and abilities ranging from elementary arithmetic to sophisticated calculus and beyond were examined in each round. Participants worked on addressing problems both individually and in groups.

Students from all academic levels, including undergraduates, enthusiastically participated in the event. The wide range of backgrounds and skill sets fostered a dynamic environment for learning and cooperation.

The Highlights:

1. Problem-Solving Rounds: Through a series of problem-solving rounds, participants demonstrated their mastery of mathematics by tackling issues that required critical thinking and inventive solutions.
2. Team Challenges: Participants worked together to tackle challenging mathematics problems within a set amount of time in order to foster collaborative teamwork.
3. Interactive Sessions: Faculty members led interactive sessions that offered advice on efficient problem-solving techniques as well as insights into how mathematical principles are applied in the real world.
4. Rewards and Recognition: Participants were inspired to aim for excellence in mathematical activities by the recognition and rewards bestowed upon outstanding performers for their outstanding contributions.

PREPARATION OF MATHEMATICAL MODELS

Title: "PREPARATION OF MATHEMATICAL MODELS"

Date: 3 – 4th November 2023

The SAS Degree College in Narayanapuram, Department of Mathematics recently hosted a workshop on "Preparation of Mathematical Models". The objectives of this event were to highlight mathematical skills, encourage problem-solving abilities, and cultivate a positive competitive spirit among students.

Event Format:

The goal of the workshop on the preparation of mathematical models was to give participants the know-how and abilities needed to build mathematical representations of real-world occurrences that are correct. In many disciplines, including biology, economics, engineering, and environmental science, mathematical modeling is essential for analyzing, forecasting, and optimizing complex systems by practitioners and researchers.

The Highlights:

Fundamental Ideas: An introduction to the basic ideas of mathematical modeling was given at the start of the program. The concepts of abstraction, simplification, and mathematical structure representation of real-world systems were presented to the participants. We talked about the fundamental modeling methods, such as difference equations, stochastic models, and differential equations.

Model Development procedure: The participants received a step-by-step handbook explaining the model development procedure. The formulation of problems was emphasized.

Title: Electrochemistry in Everyday Life

Introduction: Electrochemistry is a branch of chemistry that deals with the study of Chemical reactions involving the transfer of electrons between species. It plays a

crucial role in various aspects of our daily lives, from powering our electronic devices to facilitating essential processes in our bodies. This brief report aims to highlight some key applications of electrochemistry in everyday life.

1. **Batteries:** One of the most significant applications of electrochemistry is in batteries. Batteries power a wide range of devices we use daily, such as smartphones, laptops, and electric vehicles. These devices rely on electrochemical reactions to convert chemical energy into electrical energy, allowing them to function efficiently without being tethered to a power source.
2. **Corrosion Protection:** Electrochemistry also plays a crucial role in preventing corrosion, which can affect structures like bridges, pipelines, and even household appliances. Techniques such as cathodic protection utilize electrochemical principles to prevent the oxidation of metals, thereby extending the lifespan of various materials and infrastructure.
3. **Electroplating:** Electroplating is a process that uses electrochemistry to coat one metal with a thin layer of another metal. This technique is commonly used to enhance the appearance of objects, prevent corrosion, and improve conductivity. Items such as jewelry, kitchen utensils, and automotive parts often undergo electroplating to provide them with desirable properties.
4. **Water Treatment:** Electrochemical methods are employed in water treatment processes to remove pollutants and contaminants from water sources. Techniques like electrocoagulation and electrooxidation utilize electricity to facilitate the removal of heavy metals, organic compounds, and other impurities, making water safe for consumption and other uses.
5. **Biological Processes:** Electrochemistry plays a vital role in various biological processes within our bodies. For instance, nerve impulses and muscle contractions are facilitated by the movement of ions across cell membranes, which involves electrochemical gradients. Additionally, medical devices such as pacemakers utilize electrochemical reactions to regulate heart rhythms and ensure proper functioning of the cardiovascular system.

Conclusion: In conclusion, electrochemistry is deeply integrated into various aspects of our daily lives, from powering our devices to preserving infrastructure and maintaining our health. Understanding the principles of electrochemistry not only enriches our scientific knowledge but also enables us to harness its potential for practical applications that enhance our quality of life. As technology continues to advance, the role of electrochemistry is likely to expand, leading to further innovations and improvements in numerous fields.

Title of the activity: INTERNATIONAL WEBINAR ON EMERGING TRENDS IN NANOTECHNOLOGY FOR MODERN APPLICATION

Date : 28.02.2023

Name of the Resource person: DR.T.K VISWESWARA RAO

No.of lecturers participated: ALL

No.of students participated: 200

Brief report on the activity:

The Department of Physics and IQAC Organised a programme "INTERNATIONAL WEBINAR ON EMERGING TRENDS IN NANOTECHNOLOGY FOR MODERN APPLICATION" at Department of Physics, & IQAC, SAS Government Degree college, Narayananapuram on 28.02.2023. The main objective of this programme is to develop in students thinking power towards the nano science world.

To enhance the student thinking power and ability to nano science , remove the fear of science subjects, science experiments, Experimental orientation, hands on experience and to gain the science knowledge towards the physics subject for school children's and Intermediate students.
